

# PHILIPS TECHNICAL REVIEW

VOLUME 18  
1956/1957

52  
B 1218 415

# CONTENTS

## VOLUME 18, 1956/1957

### LIGHT

	Page		Page
Lighting in trains and other transport vehicles with fluorescent lamps, by L. P. M. ten Dam and D. Kolkman . . . . .	11	Colour and colour rendering of tubular fluorescent lamps, by A. A. Kruithof and J. L. Ouweltjes . . . . .	249
The noise emission of ballasts for fluorescent lamps, by E. W. van Heuven . . . . .	110	*Small ballasts for fluorescent lamps, by Th. Hehenkamp . . . . .	279
Fifty years of the high-pressure mercury vapour lamp, by W. Elenbaas . . . . .	167	*Floodlighting of the Dutch National War Memorial in Amsterdam, by M. Rutgers van der Loeff and J. B. de Boer . . . . .	300

### TELECOMMUNICATIONS

A private automatic branch exchange using high-speed uniselectors, by B. H. Geels . . . . .	19	The life and reliability of valves, by K. Rodenhuis, H. Santing and H. J. M. van Tol . . . . .	181
Phase linearity of television receivers, by A. van Weel . . . . .	33	A flying-spot scanner for televising 35-mm film, by F. H. J. van der Poel . . . . .	193
*A reflex klystron for 4-mm waves, by B. B. van Iperen . . . . .	51	Entropy in science and technology, IV. Entropy and information, by J. D. Fast and F. L. H. M. Stumpers . . . . .	201
Behaviour of the transistor at high current densities, by F. H. Stieltjes and L. J. Tummers . . . . .	61	Problems in the construction of small radio valves, by B. A. Cant . . . . .	217
A pentode gun for television picture tubes, by J. C. Francken J. de Gier and W. F. Nienhuis . . . . .	73	Thin tungsten wire for small radio valves, by L. Schultink and P. G. van Zanten . . . . .	222
Amplitude modulation of centimetre waves by means of ferroxcube, by H. G. Beljers . . . . .	82	*A new kind of tuning-indicator tube, by H. te Gude and E. Schaaff . . . . .	243
*An automatic noise-figure indicator, by F. L. H. M. Stumpers and N. van Hurck . . . . .	141	*Rectangular cathode-ray tube of high aspect ratio, by F. G. Blackler . . . . .	298
*A transistor radio receiver powered by a thermopile, by J. van Hengel and J. Volger . . . . .	155	The EC 57, a disc-seal microwave triode with L cathode, by G. Diemer, K. Rodenhuis and J. G. van Wijngaarden . . . . .	317
The application of ferroxcube in unidirectional waveguides and its bearing on the principle of reciprocity, by H. G. Beljers . . . . .	158	A high-speed rotary selector for automatic telephone exchanges, by J. M. Unk . . . . .	349
		A low-noise klystron with high power output, by R. A. La Plante and G. A. Espersen . . . . .	361

### SOUND

Mechanical phenomena in gramophone pick-ups at high audio frequencies, by J. B. S. M. Kerstens . . . . .	89	A transistor pre-amplifier for the magnetodynamic pick-up, by C. Huber and J. Rodrigues de Miranda . . . . .	238
A magnetodynamic gramophone pick-up, by N. Wittenberg . . . . .		*A musical instrument for deaf-mute children, by R. Vermeulen . . . . .	276
I. Construction . . . . .	101	A loudspeaker installation for high-fidelity reproduction in the home, by G. J. Bleeksma and J. J. Schurink . . . . .	304
II. Frequency characteristics . . . . .	173		
The noise emission of ballasts for fluorescent lamps, by E. W. van Heuven . . . . .	110		

\*) Articles marked with an asterisk are brief reports.

## X-RAYS AND NUCLEAR PHYSICS

The study of thermal conductivity problems by means of the electrolytic tank, by F. Reiniger . . . . .	52	Nuclear X-ray sources, by S. Fine and C. F. Hendee . . . . .	229
*The measurement of radioactive iodine in the thyroid gland, by A. M. J. Jaspers . .	87	Counters for X-ray analysis, by P. H. Dowling, C. F. Hendee, T. R. Kohler and W. Parrish . . . . .	262
Cold-cathode trigger tubes, by C. H. Toss will	128		

## MEASURING EQUIPMENT

The study of thermal conductivity problems by means of the electrolytic tank, by F. Reiniger . . . . .	52	*A new kind of tuning-indicator tube, by H. te Gude and E. Schaaff . . . . .	243
*The measurement of radioactive iodine in the thyroid gland, by A. M. J. Jaspers . . .	87	*Cathode-ray display of complex quantities at varying frequencies, by M. J. van Schagen . . . . .	380
*An automatic noise-figure indicator, by F. L. H. M. Stumpers and N. van Hurck	141		

## MATERIALS AND THEIR RESEARCH

An emission electron microscope for research at high temperatures, by G. Baas and G. W. Rathenau . . . . .	1	Thin tungsten wire for small radio valves, by L. Schultink and P. G. van Zanten . . . .	222
Amplitude modulation of centimetre waves by means of ferroxcube, by H. G. Beljers . .	82	Ferroxcube material for piezomagnetic vibrators, by C. M. van der Burgt . . . .	285
Ferroxplana, hexagonal ferromagnetic iron-oxide compounds for very high frequencies, by G. H. Jonker, H. P. J. Wijn and P. B. Braun . . . . .	145	Switching time of ferrites with rectangular hysteresis loop, by H. van der Heide, H. G. Bruijning and H. P. J. Wijn . . . .	336
The application of ferroxcube in unidirectional waveguides and its bearing on the principle of reciprocity, by H. G. Beljers . . . . .	158	*The evolution of the permanent magnet: a brief review, by H. J. Meerkamp van Embden . . . . .	358

## MISCELLANEOUS

An emission electron microscope for research at high temperatures, by G. Baas and G. W. Rathenau . . . . .	1	Entropy in science and technology, IV. Entropy and information, by J. D. Fast and F. L. H. M. Stumpers . . . . .	201
The gyrator, an electric network element, by B. D. H. Tellegen . . . . .	120	Switching time of ferrites with rectangular hysteresis loop, by H. van der Heide, H. G. Bruijning and H. P. J. Wijn . . . .	336
*Levitation by static magnetic fields, by A. H. Boerdijk . . . . .	125	Ultrasonic machining, by E. A. Neppiras and R. D. Foskett, . . . . .	
Cold-cathode trigger tubes, by C. H. Toss will	128	I. Technique and equipment . . . . .	325
		II. Operating conditions and performance of ultrasonic drills . . . . .	368
